

D365 Project – RAV – Finalizing Production Orders

D365 – Processing Production orders

Issue

- **Running Average cost is not calculated for Make to Resell products**

Reason

- **Finance decision :production orders should only be finalized after invoicing**
- **<> Buy to Resell where stock valuation is done at reception**

D365 – Processing Production orders

GOAL:

- **Streamline process between Make to Resell and Buy to Resell**
- **Have a correct stock valuation after production runs**
- **Use more correct stock valuation as sales price in IC transactions**

D365 – How to reach that goal?

- **Split up current mass production orders into production orders reflecting representative production runs**
- **Estimation step to consolidate production runs into 1 service PO**
- **Report as finished + ENDING of production orders at each run**
- **Have a correct stock valuation after production runs**

Let's dig into it!!!!
